

## Teeth for wood grinders

## Teeth for wood grinders

for Doppstadt

solid carbide teeth available in different styles

hardware available

extra-wide wedge for additional holder protection

tooth with carbide hardfacing

### Work smart

#### Your benefits from using KingKong-Tools holder system for Doppstadt grinders:

- ▶ perfectly rigid system with extra wide support surface
- ▶ extra-wide clamping wedge for reduced holder wear
- ▶ high material output due to aggressive cutting angle
- ▶ different tooth options to match your application

KingKong-Tools system assembly consisting of hammer (BFS461) holder (KHS1005) clamping wedge (BFS466)

### The right tooth for all applications:

#### BFS462-P

KingKong-Tools standard hammer with carbide hardfacing. Special tungsten grit powered by King Grit™.

Recommended application:

- waste wood
- contaminated material

#### BFS460

KingKong-Tools standard hammer with solid tungsten carbide.

Recommended application:

- stumps and logs
- abrasive applications

#### BFS461

KingKong-Tools standard hammer with solid tungsten carbide and additional carbide protection below.

Recommended application:

- composting
- soil & sand contaminated material
- to position at side of drum

### Special recommendation:

#### BFS522

KingKong-Tools „Python“ tooth with tungsten carbide tip. Primarily recommended in conjunction with BFS460, BFS461 or BFS462-P. Increases your fuel efficiency with a punch.

Recommended application:

- waste wood
- logs
